

ACTIVE 80

SPREADER • SURFACTANT DEPOSITION AID • DEFOAMER

PRODUCT DESCRIPTION

Active 80 is a multi-purpose adjuvant that has non-ionic surfactants that make it compatible with most of today's chemicals used in custom application.

Active 80 can be used with most pesticides to improve performance, by reducing surface tension, giving uniform droplets, that results in higher deposition and better coverage.

Active 80's unique defoaming ability will help reduce the foaming of many agricultural combinations.

DIRECTIONS FOR USE

In most instances add Active 80 in water before adding pesticides or other materials to spray tank. Variations in use conditions can result in changes in the amount of Active 80 required. If mixing order is not known use a small container and check compatibility and mixing order.

ACTIVE INGREDIENTS

Alkylaryl Polyether Alcohols, Silicone
and Glucose Blends 80.00%
Inerts 20.00%

Surfactants in Active 80 are exempt from the requirement of tolerance under Title 40 CFR, 180.1001 (d).
