

DYNA GOLD™

Cabbage & Potato Spray

PRODUCT INFORMATION

Dyna Gold Cabbage & Potato Spray is a highly active liquid foliar spray designed to prevent and correct selected deficiencies. If added to spray tank first, it will aid in lowering water pH. The addition of a non-ionic surfactant is essential in aerial application and will enhance uptake in conventional ground application. Dyna Gold Cabbage & Potato Spray will also help in correcting or preventing deficiencies caused by excess water or other factors relating to stress. A jar test to check the compatibilities of unfamiliar or new combinations should be performed prior to mixing and application.

CROP RECOMMENDATIONS

Cabbage and Potatoes: Apply 1 quart per acre in first spray with 1 to 2 pints per acre throughout the growing season or as needed. Use adequate water for complete coverage.

Row Crops and Other Vegetables: Apply 1 quart per acre in enough water to cover through fruit set or as needed.
