## Hi-Cal

### Cotton & Bean Mix

#### PRODUCT INFORMATION

DynaGold Hi-Cal Cotton & Bean Mix is a liquid foliar formulation designed to correct and prevent deficiencies in cotton, beans, and many other crops. DynaGold Hi-Cal will also influence the activity of certain enzymes in cotton and legumes. A low supply of Calcium may result in larger plants with fewer fruiting forms. If added to the spray tank first, DynaGold Hi-Cal will aid in lowering the water pH. A jar test to check the compatibilities of unfamiliar or new combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant, DynaZone® or Threshold® will aid in reducing surface tension and improve uptake.

#### CROP RECOMMENDATIONS

DynaGold Hi-Cal may be used to prevent deficiencies on the following crops: alfalfa, almonds, avocados, apples, barley, beans, broccoli, cabbage, cauliflower, carrots, celery, citrus, corn, cotton, cucumbers, eggplant, grapes, lettuce, milo, melons, rice, pears, pecans, peppers, potatoes, peanuts, strawberries, tomatoes, turf, turnips, watermelons and wheat.
