

DYNA GOLD™

Peanut Mix LIQUID FOLIAR SPRAY

PRODUCT INFORMATION

Dyna Gold Peanut Mix is a concentrated foliar formulation of chelated micro and secondary plant nutrients. This versatile formula combines high solubility with convenience for either aerial and ground applications. It is especially designed for rapid plant assimilation that will under normal circumstances prevent nutrient deficiencies. A jar test to check the compatibilities of unfamiliar or new combinations should be performed prior to mixing and application. Dyna Gold has a low pH and will buffer the water in your spray tank when added first.

Dilute Spray: Use recommended rate in a minimum of 40 gallons of water per acre.

Concentrate Spray: Use recommended rate in a minimum of 20 gallons of water per acre.

Aerial Application: Beco-mist, helicopter, fixed wing: Apply 1 quart per acre in minimum of 5 gallons of water. Additional water is desirable and will give better coverage. The addition of a non-ionic surfactant will lower surface tension, improving coverage and giving a more even greening effect.
