

DYNA GOLD™

Vegetable Mix

LIQUID FOLIAR SPRAY

PRODUCT INFORMATION

DynaGold Vegetable Mix is a liquid foliar formulation designed to correct and prevent deficiencies in vegetable crops. If added to the spray tank first, DynaGold Vegetable Mix will aid in lowering the water pH. A jar- test to check the compatibilities of new or unfamiliar chemical combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and /or urea nitrogen will aid in uptake.

DIRECTIONS FOR USE

DynaGold Vegetable Mix should be applied at weekly intervals starting with the first spray at 1 to 2 quarts per application in enough water to cover. Aerial application: 1 quart per acre in 5 to 15 gallons of water.
