

# DYNA GREEN™ Iron

## Liquid Foliar Spray

### PRODUCT INFORMATION

Dyna Green Iron is a liquid foliar formulation designed to correct and prevent iron deficiencies in most crops. If added to the spray tank first, it will aid in lowering the water pH. A jar test to check the compatibilities of new or unfamiliar combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and/or urea nitrogen will aid in uptake. Do not use this product in aerial or ULV applications in combination with Magnesium nitrate on spinach or other iron-sensitive crops. Application of only Iron at 1 to 2 pints per acre if deficiency is evident will aid in correction.
