

DYNA GREEN™

TF

Turf Formula

PRODUCT INFORMATION

Dyna Green TF is a liquid foliar formulation designed to correct and prevent the most common mineral deficiencies in many grass species. When used first in the mixing order, it will help in reducing the pH of the final spray solution. A jar-test to check the compatibilities of unfamiliar or new combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and/or urea will aid in plant uptake.
