

# pHylo+

**Non-ionic, Compatible, Multi-purpose, Biodegradable**  
**SPREADER • SURFACTANT • DEPOSITION AID • BUFFERING AGENT**

## INFORMATION

**pHylo+** should be used with most pesticides that require a low water pH to slow down hydrolysis or breakdown of products. If water pH is kept in the 4 to 5.5 range, the half-life of most pesticides will be increased.

**pHylo+** is a multi-purpose adjuvant that has non-ionic surfactants that make it compatible with most of today's chemicals used in custom application.

**pHylo+** can be used with most pesticides to improve performance, by reducing surface tension and giving uniform droplet size that results in higher deposition and better coverage.

**pHylo+'s** unique defoaming ability will help reduce the foaming of many agricultural chemical combinations.

## PRECAUTIONS

Avoid getting in the eyes or mucous membranes. Use with adequate ventilation. Keep container capped when not in use. **KEEP OUT OF REACH OF CHILDREN.** Do not reuse empty container. Do not contaminate feed, seed or water supplies. The use of side-shielded safety glasses is recommended.

## ACTIVE INGREDIENTS

## DIRECTIONS FOR USE

In most instances add pHylo+ in water before adding pesticides or other materials to spray tank. Variations in use conditions can result in changes in the amount of **pHylo+** required. If mixing order is not known use a small container and check compatibility and mixing order.
