Equipment:	Chemical splash-proof goggles.		
	Chemical resistant apron and/or rubber boots may be needed.		
Containment:	Stop flow of material if safe to do so. Dike area with diatomaceous earth or sand		
	and maximize recovery. Prevent run off to storm sewers and ditches leading to		
	natural waterways.		
Clean Up:	Pump into a suitable tank or absorb with diatomaceous earth or sand. Sweep up		
	and place into suitable containers for agronomical land application at		
	recommended rates or dispose of in accordance with local/regional/national		
	regulations (See Section 13 of SDS).
